

SECTION 6 –Tooling

WARNING!

*Only trained personnel familiar with operation should use the FP150.
Always make sure the FP150 tools are in good condition and aligned and centered with track components before pressing.
Always wear eye protection when operating the FP150.*

CAUTION!

*Track condition affects the disassembly force, and some track models may exceed the capacity of the FP150.
It is the operator's responsibility to determine whether the FP150 is adequate for a particular track.*

The Tool Chart (starting on page 14) show the correct tooling for most crawler track models. For track models not listed, the drawing (below) shows the size ranges for Forcing Pins, Pin Adapters and Backing Bushing. See www.WTCmachinery.com for updated to tool charts.

FP150 Tooling

Disassembling large track models - those with high pressing forces and long pin lengths - require pairs of Pin Tools. Use the short "Starter" Pin Tool to make the initial push, and then switch to the long "Finishing" Pin Tool to complete pressing out the pin
