CG-4 Grouser Welder

Overview

The CG-4 Grouser Welder features bead oscillation and a high-current 1,000 Amp Submerged-Arc welding torch for maximum weld deposit and penetration without the need for special protective gear. The standard cut-off station works with a variety of fuel gases, and track shoe handling is easy with the included air hoist. The optional Wire Barrel holder increases run time for greater productivity.

Specifications:

Maximum Pad Width:	40 (1,02 m)
Welding Torch:	1 x 1000 Amps
Standard Wire Spool Size:	Weight - 120 lb (54 kg)
Inside Diameter:	6 in to 28 in (152 mm to 712 mm)
Optional Wire Barrel Size - Weight:	1,200 lb (540 kg)
Outside Diameter:	24 in (628 mm)
Air Hoist Capacity:	500 lb (225 kg)

Electrical

Electrical Supply:	77 kW
Standard Voltages:	Three Phase 208V / 60 Hz 220V / 50 Hz 230V / 60 Hz 385V / 50 Hz 415V / 50 Hz 460V / 60 Hz
